

Sasquatch, ET and Their Telepathic Connections

with Su Walker & Rev. White Otter

Thank you to the Sandia Mountain Crew for their help and friendship over the past several years and for teaching us what we are about to teach all of you.

Sasquatch Illustrations by Su Walker

Shameless Self
Promotional Blurb:
If you like any of the
following Big Brother
Sasquatch illustrations,
many of the originals
are here at the
conference for sale.

See Su or White Otter
for details.

Who are we?

Su Walker - Professional clairvoyant for 27 years.

Rev. White Otter - Reiki master & shaman for 35 years.

Both are lifelong UFO experiencers.

Together they have 60+ years of combined paranormal, psychic & telepathic experience.

Although the story you are about to hear sounds like fiction, it's 100% real. We were there. We will not embellish or exaggerate.

But fair warning--
You are about to enter into an area of high strangeness....

But then again, considering the nature of this particular Sasquatch conference, perhaps high strangeness has a slightly different definition here.

White Otter and I were asked to come to this event and speak with all of you about telepathy, ET and Big Brother Sasquatch....

...but *WHO*
asked us to
come all the
way from
New Mexico
might
surprise
you.

Honest admission time:

White Otter & I DO NOT have the hands on experience in the field with the Big Brother Sasquatch nations that many of you have. (We'd love to be invited!)

We are here because we were given the ET/Sasquatch/telepathy piece...and asked to come teach you. The people who sent us want you understand how these things are connected.

Before we get to that however, we need to talk about something else very briefly.

This is Dr. J. Allen Hynek. He worked for the US Air Force for 20 years and consulted on 3 different UFO projects.

Dr. Hynek developed a way of classifying unique experiences and encounters....

...with UFOs

(un-identified flying
objects)

and....

...folks who are not from Earth.

The Hynek Scale is sometimes referred to as the Close Encounters scale.

**Close encounter
of the 1st kind--**

I saw a UFO:

Although a witness observes a UFO nearby, there appears to be no interaction with either the witness or the environment.

13 July 1969

Van Horn, Iowa

Close encounter of the 2nd kind--Something else happened:

A UFO event in which a physical effect is alleged either with the witness or the environment.

**Close encounter of
the 3rd kind--
Somebody else
was there:**

UFO encounters in which an animated creature is present (could be human, non-human or mechanical as in android or robot.)

Close encounter of the 4th kind- Something trippy happened:

UFO cases where witnesses experience a transformation of their sense of reality.

(Includes non-abduction & abduction cases where absurd, hallucinatory or dreamlike events are associated with UFOs or their occupants.)

**Close encounter of
the 5th kind--**

**Both parties choose
to communicate:**

Voluntary bilateral
communication between
a Star Nation person
and an Earth Human.

We say CE-5.

Our CE-5 began in September of 2013

...and it's *still* going on!

Maybe we should explain how it all started.

Today, Otter and I are married and reside in the Albuquerque, New Mexico area. From our backyard looking east, we have a wonderful view of the Sandia Mountain.

But back in September of 2013, we had just started dating. That month, I traveled from the midwest to visit White Otter at his home in New Mexico for the first time. I found the Land of Enchantment fascinating!

Less than 10 days after arriving in the Albuquerque area, I first started hearing “The Voice.” It wasn’t a spirit. I’ve spent more than 25 years as a professional detail psychic, and believe you me I know the difference. This was no ghost.

The Voice always came from the same spot 10 miles east of us inside the Sandia Mountain...

and after a week or so of listening to it telepathically, instead of continuing to call it

“The Voice from the Mountain,”

I gave it the nickname “Sandia.”

It made sense to me at the time.

In Spanish, sandia means watermelon

Believe it or not, when I gave the voice from the mountain the nickname

Sandia

he IMMEDIATELY piped up, chuckled, and then telepathically said...

**“Watermelon
head...**

that’ll work!”

Wait....

What?!!

What did he mean?!

I didn't know at that point in time exactly who Sandia was, but he did strike me as someone who had a rather odd sense of humor.

It was not until several months later I figured out exactly what the “watermelon head” reference meant.

At first it was random....

During that first month or so Sandia spoke to both Otter and I randomly.

He might make comments about world news, quip about private conversations we were having, or tell us who he thought deserved to win America's Got Talent.

Like I said...it was random.

Sandia admits where he's from

It took about 2 months before things shifted from random to daily chats with Sandia.

It took that long before he finally shared a little more detail about himself and where he called home.

This is the area of the galaxy near Zeta Reticuli

Zeta Reticuli is a small constellation in the Southern Hemisphere. Sandia tells us there are several Earth visitors who call this area of the Milky Way galaxy home.

Meet Sandia

Commander Tlkm (say teal-come)

Home World: P'nti (say Pon-tell) the 5th planet orbiting Zeta Reticuli II.

Their Sandia Mountain complex acts as one of four P'nti managed, landbased information stations on Earth. It runs two miles deep and several dozen P'nti work there on any given day.

Early on, Sandia made
one thing *very* clear:

“Please don’t call me an alien.

That term is insulting.

Please don’t call me a ‘grey.’

I don’t call you a pink or a brown.”

You see we are human too, just not Earth human. Genetically, you could call us distant cousins.

From then on, we chatted nearly everyday with Sandia and over the next year plus honestly became friends.

It wasn't until the February 2015, that he chose to introduce us to more members of his crew.

Jrooti

R'hz

T'ni

Jrooti (say jroo-tee)
Communications specialist

Jrooti was introduced to us in February of 2015. She has taught us a great deal about telepathic cultural protocols and has introduced us to several other Star Nations who are not P'nti.

R'hz (say Rah-haaz or Radar)

Radar was also introduced to us in February of 2015 as the complex's pilot, stellar cartographer, long range telepath & Earth media specialist.

Radar was the one who began telling us of his personal friendship with the extended northern New Mexico Big Brother Sasquatch Clan and has introduced us to individual family members of that group.

T'ni (say Tah-knee or simply Teenie) was introduced to us in June of 2016 and has worked with us for more than a year on writing the telepathy course we are going to teach at this conference.

The P'nti have shared with us a great many details about the Sasquatch Nations, their special capabilities and their connections with more than just our visitor friends from P'ntl.

The amazing thing for us is that what the P'nti have told us nearly completely agrees with information given by the Sasquatch Nations to some of the researchers here at this conference.

But we
received our
information
from the Zetas
and the
instruction to
come teach
telepathy to
you before we
knew any of
this.

So....
what have our
ET friends
told us about
the
Sasquatch
Nations on
Earth and
their
connections
to them?

First of all, at least some of the Big Brother Sasquatch are not primitive people just learning to make fire.

They tell us their history on this planet goes back more than 20 million years to the beginnings of the Neogene period.

Not only do the Big Brother Nations have friends in high places, some of them travel a great distance just to come visit Earth. The P'nti tell us you can now find Sasquatch peoples on other worlds.

Theirs is a species whose body type and capabilities are adaptable to many different strenuous environments, and who enjoy exploring new worlds with the P'nti.

We are told that the Sasquatch Nations here on Earth are companions of and/or regularly travel with or live along side of a number of different extraterrestrial folks, not just our friends from P'ntl.

Which Star Nations pal around with which Big Brother Bigfoot clans entirely depends on where in the world you are talking about.

For example....

In the eastern mountain ranges of North America, from Canada to Florida, Sasquatch have been seen traveling with or living near:

- Giant canines
- Bipedal wolves
- Multi-dimensional humans
- Lizard-men
- Other woodben (their term for all sentient forest folk.)

Four Corners - UT, CO, NM, & AZ

Upper Fruitland

But in the Four Corners area of the USA, especially up on the Navajo Reservation the list of cyptid companions is a little different.

© 2017 Google

Image Landsat / Copernicus

38 km

Google Earth

According to the Navajo Times, in the spring of 2012 there were more pegasus, griffin and centaur sightings reported on Navajo land, particularly in northeast AZ & northwest NM area, than bigfoot. (Thought it was just Old Europe didn't ya?)

The Sagittary—Centaur.

So...if some of the
Sasquatch really ARE
friends with ET....
or even ETs themselves

...why create all these
primitive structures?

Why would they choose to live here on Earth in such a low tech manner

if they have friends from such high tech places...?

According to our Zeta friends,
you ***don't have to be high tech***
to achieve Advanced Civilization Level Zero.

They tell us that a number of the Sasquatch
Nations are at a higher advanced civilization
level than we Earth Humans are!

That's because they provide for their people. They make sure everyone has food, water and shelter and is taken care of.

Because, in 20 million years time, **WHAT** they have figured out is way of living that keeps everything in physical, emotional & spiritual balance...

...and that makes
them happy.

They live life
in the now
and find
themselves
and their
people better
off keeping it
simple
without the
technology.

We Earth Humans haven't yet reached Advanced Civilization Level 0.

That's because we DON'T provide food, water and shelter for all our people.

We just aren't there yet!

And we don't
live in
balance with
our world.

Not by ANY
stretch of the
imagination!

A large brown bear is the central focus of the image, standing in a lush green forest. The bear is facing left, with its body angled towards the viewer. The background is filled with dense foliage, including tall grasses and various trees. The lighting is natural, suggesting a daytime setting. The overall tone of the image is somewhat somber due to the bear's dark fur and the dense, slightly overgrown forest environment.

Sandia says:

The Sasquatch Nations call themselves The Beautiful People

**They call Earth Humans:
The noisy ones,
The naked ones,
The messy ones
or simply just
Hair heads.**

They also refer to themselves and other sentient forest folk (no matter what their size) as woodben.

So, what do our Star Nation friends from P'ntl say about some of this other crazy stuff surrounding Sasquatch?

Like the UFOs that have been spotted or unexplained lights in the sky that show up when you're out squatching.....

....the
strange
floating fogs
(dark, light,
colored or
luminescent)
that seem to
be under
intelligent
control...

...the
moving balls
of light that
appear and
disappear
out of
nowwhere...

...and the
orbs that
show up
in so
many
photos,
some
with
faces in
them!

And what about those

- Unexplained voices
- Imitated nature sounds
- Strange mechanical noises
- Infrasound frequencies

..or freaky images caught in a single 1/60th of a second frame of your camera exposure, moving faster than your eye can see.

What about unusual weather effects that are extremely localized and seem to be under directed control....?

...and the batteries
that drain or
electronics that
suddenly malfunction
for no reason...?

Does
Sasquatch
really have the
capability of
becoming
invisible at will?

Or the ability to manifest something out of thin air?

Can they bilocate themselves or other things through solid objects?

And if you
give Big
Brother
Sasquatch a
camera and
let him take
pictures...

Ah, but that's
Mr. Mike
Paterson's
story to
tell....

We won't
spoil it.

First things first, let's begin with one of the major reasons why Otter and I are here.

Is Sasquatch telepathic?! YES!!!

We know that at least some of the Big Brother Nations on Earth right now ARE telepathic.

We don't know if they all are.
The P'nti say there are seven nations.

Do the Sasquatch telepathically know when you're getting close to them?

Yes, they sure do! Usually they check you out to see what your intent is.

We call it getting "pinged."

Can Sasquatch telepathically link with another species (like a bird) to observe or follow you?

Yes, they can choose to “see through the eyes of another” when they wish to.

Can Sasquatch use any sort of mind control on you?
Can they “wipe your memory?”

Yes, ALL telepathic
nations can and would if
they really needed to.

Yes they DO have the
capability of controlling
your actions and “wiping
your memory.”

We will say it again
because it's important...

...when you get close to a
telepathic nation of ANY KIND,
their first instinct is to probe you
until they find out exactly why you
have entered their territory.

They want to know if your
intentions are rightminded.

After all, they have homes
and families to protect.

If you were them, you would
want to make sure your kids
were safe from the “hair
heads” too...

...any way you could.

Is it possible for you to end up with a headache or nausea after an intense or lengthy contact with a telepathic nation?

Yes, if you are not used to it, it sure is.

Mentally
for a while
you can
feel like
you are in
a fog, as if
you're
here but
not here.

After your first big contact, it's not unusual to feel completely and utterly overwhelmed.

You may also find you have a little missing time.

That's not out of the realm of possibility either.

With missing time or “memory wipes,” your memories are still there, but stored in your brain like your dreams are...with poor long term recall connections.

They may surface for you later in snatches when you do something which puts you in a timeless (alpha-theta) state of consciousness.

**KEEP
CALM
AND
PRETEND
TO ACT
NORMAL**

All of these effects and symptoms should be considered both possible & in this area normal.

Breathe, stay calm, and allow things to settle emotionally, physically and spiritually just a bit.

You're really okay.

Any of these effects may last several hours or days.

If you experience any of them, we suggest:

- Record your physical and emotional changes
- Keep track of any unusual dreams, thoughts or experiences for 72 hours plus. Expect more.
- Immediately treat yourself like you've got the flu--easy to eat foods & plenty of electrolytes
- Take pain relievers as needed
- If pain or vomiting doesn't subside, see a doctor
- **DO NOT STAY ALONE** - have a buddy watch you

When you get a really intense controlling telepathic connection suddenly established hard fast and strong your neurological system rebels and you can go into a kind of neuroshock.

You see, your brain is getting a dose of something it isn't used to...not at that level.

But once you've had that first big telepathic connection, the ability stays with you and continues to go both ways!

You'll sense the Sasquatch easier from that point on ...and they will pick up on you quicker as well.

The REALLY good news is that after just about any interaction with a telepathic species, your ability to learn to control your OWN telepathy will come MUCH faster and easier.

You've been "wired for sound."

Now you just need to practice!
This is a skill and like any other skill, it gets better with repetition and feedback.

It doesn't take long at all before you'll be able to distinguish different telepathic "voices"...but it's more than that, it's the emotional recognition of an individual too.

You see telepathy runs on an emotional carrier wave.

In the days following an intense telepathic interaction, your emotions can feel a bit roller coasterish.

Take a breath, relax and
**ALLOW YOUR FEELINGS
TO SURFACE!!!**

**With
telepathy,
you will
need
to get
used to
this level
of
emotional
honesty.**

Will you keep having the headaches, emotional roller coasting or any of the other negative effects every time you get telepathically pinged?

You could if your intentions and actions are wrongminded.

Intention is everything!

It's also very possible your first telepathic interaction will be kind, gentle, funny and *really* easy...

...as if someone invisible were inside your head softly whispering,

“Net-dah-hoo.”

Finally, after your first big telepathic interaction, you may also find you experience your spiritual connections with the world quite differently.

You've been "wired for sound" remember?

What's with the
bright flashes of
light and
suddenly
Sasquatch
appears or
disappears...?
What's up with
that?

According to our Zeta teachers the sudden flashes can happen a couple of ways...

When someone or something “opens and closes a door,” just like when you open your front door and the light from inside spills out into the night.

If there is a ship on the ground or even the entrance to a facility nearby which is cloaked you can get this kind of light spill effect. They literally can open a door and you can catch a glimpse of their interior light as they enter or exit.

Our P'nti friends say they regularly visit the Sasquatch folks and it's not impossible at all for the Brothers to have visitors who keep a cloaked vessel somewhere close by.

SOME of your
mechanical
sounds may
come from a
source like
this...but
Sasquatch
are also great
imitators,
so...
...we dunno.

OS - 4

Could you also see a flash or witness an orb manifest when something or someone crosses from another dimensional space into this one?

Yes it's not only possible, it's common.

Our friends use this analogy:

On Earth we know two distinct environmental niches can butt up against one another, with species that can live in either location or both.

We know that with no effort at all, some species step from one to the other. In this photo the forest comes right up to the shore...and you could step right from the treeline to the beach.

There ARE advanced beings whose duo environmental niche happens to straddle two different dimensions, who live easily in either world and move from one to the other

....like the Sasquatch.

Do the Sasquatch know what's going on in both our dimension as well as whatever theirs is at the same time?

A painting of a gorilla in the foreground, looking towards the viewer. The gorilla is rendered in shades of brown and black, with a human-like face. The background is a vibrant, swirling pattern of blue and green, suggesting a forest or a dreamlike environment. The overall style is expressive and somewhat abstract.

Yes, as a telepathic species
they can be there and watch
what you do here very easily.

By this same token, taking something from their dimension and dropping it into ours is no harder than tossing a pebble from the forest and having it land on the beach.

When this manifesting from their dimension into our own happens you might experience:

- Flashes or balls of light
- Floating fog/vapor
- Popping or electrical sounds
- Rushing of wind or cold
- Sudden change in EMF
- Electronic malfunctions
- Or stuff just silently appears

When Sasquatch
are invisible, are
they in their
dimension or ours?

Both.

The dimensions
overlap and exist in
the same space.

The Sasquatch
People simply
choose to be
visible or not on a
moment by
moment basis...like
you might choose
to change from
your red jacket to
your green one.

By the age of 5 or so, Big Brother's kids are taught when, where and why it's important to stay unseen.

Every once in a while, they forget, or are surprised enough by something they don't stop and think.

But most of the time it's a normal everyday thing for them to "step across" and is no big deal.

This explains those single tracks you find in the middle of nowhere.

Walk up to a spot. Stand on left foot in their dimension.

Set right foot down in our dimension.

Walk off in their dimension, laughing all the way. (You know they have a huge sense of humor, don't you?)

What about the weird weather effects, like sudden lightning, wind, rain, etc.

Is Sasquatch doing all that too?

We don't know about ALL the strange weather phenomena, but our friends tell us if you have a ship (UFO to us) you can control the weather.

They also tell us there are advanced beings who can directly influence the weather here on Earth. These powerful 100% Dimensional Nations are telepathic as well.

So if directed,
dramatic weather
events happen,
how do you know
who's
responsible?

Honestly you
don't unless they
tell you.

Is Bigfoot intentionally draining my batteries, or making my equipment malfunction?

No, the EMF changes that are responsible for your electronics going haywire is:

- a normal side effect of things moving from one dimension to another, OR
- a dimensional individual who is very close by, OR...

Sasquatch is just messin' with ya.

Technical sidenote:

Some of you may wish to go through your old footage frame by frame.

You'll find images captured in a single $1/60$ th of a second frame that you missed because it happened so fast your conscious brain did not process it and it slipped past you when you reviewed your clips.

So, let's get back to why Otter and I are here.

The easiest way to say this is that we ALL have the internal hard wiring for telepathy.

We HAVE the connections within us: the pineal gland, the amygdala, the brain chemistry....everything.

But telepathically we Earth Humans suck!

Most of us are worse than tone deaf!

What makes the Sasquatch and the P'nti both say this?

Why do they want us to learn to use our telepathy now?

Because they BOTH tell us that we have BIG environmental changes coming quickly to our planet, and they are not easy changes to handle either.

We will need each other's help to get through it.

They tell us the Earth Human's lack of telepathy has become a huge detriment to the communication between our peoples.

If we want to talk with them in their primary language, we need to learn how to do that now!

Because whether we
like it or not,

the truth is we are
running out of time!

We haven't quite gotten to the weather patterns which cause drastic food production shortages here in North America...yet.

But we aren't that far from it. Elsewhere, drought is already creating terrible famine.

Why do they say we're worse than
tone deaf telepathically?

Because not only do we
NOT listen to our own telepathy

We tell ourselves AND our children

IT'S NOT REAL or even worse...

IT'S SCHIZOPHRENIA!!!

We train our own children right out of their innate telepathic skills.

No wonder we have a hard time trusting our telepathy.

We had no teacher.
We had no validation.

We had our reality dismissed!

If you would like to change
this...

IF you would like to learn how
to develop your own telepathy

We've had a pretty good friend
and teacher give us a few
shortcuts and some really good
pointers that make it easier.

T'ni

Among the things we will be teaching in our Telepathy 101 workshop:

- 1) It's much more than just a voice in your head
- 2) How to get started
- 3) Holding telepathic states
- 4) Trusting your perceptions
- 5) Maximizing your skills
- 6) Telepathic protocols

Our focus is helping you get farther, faster with your beginning telepathic learning.

We like classes that eliminate the BS and cut to the chase, so that's how we teach.

Our class will be held twice, both
Friday and Sunday evenings.
Feel free to come hang out with us.
We promise you'll have fun.

Telepathy 101

Friday 6-8 PM

Sunday 5-7 PM

\$25

Come take a
bite out of their
apple.

It's pretty
yummy!

Questions?

Our deepest thanks to the Sandia Mountain Crew for all their patience in teaching us over the past several years!

We would not have this information without them. Thanks guys!!!
